Real-Time AI-Powered Chat Application (MERN, Google Gemini, Redis, Socket.io)
Developed a full-stack real-time chat application using the MERN stack (MongoDB, Express.js, React.js, Node.js), enhanced with AI-powered conversational support via Google Gemini API. Implemented Socket.io for seamless real-time messaging and integrated Redis to optimize performance through efficient caching and message handling. Designed scalable REST APIs, ensured secure authentication, and delivered a responsive, user-friendly UI. This project strengthened my expertise in full-stack development, real-time communication, AI integration, and performance optimization in production-ready web applications.
